

PMC Group is the Nordic market leader in hydraulic and pneumatic solutions for industrial automation and production.

PMC possesses substantial technological competence for developing high-quality solutions for virtually all types of industrial production, including the paper industry.

By providing everything from customized systems to components, special products and a full range of maintenance and lifecycle services we have unique ability to offer our customers the best complete solutions.

Solutions for papermills

pmcgroupTM

Pneumatic & Hydraulic solutions for papermills

Shower pipe oscillators

a b

Cylinders for wire stretching and guiding

a b c

Cylinders for hoisting and locking doctor beams

b c d e

2300 series hydraulic cylinder designed for paper mill standard

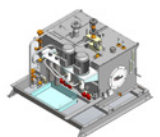

a b d e f g h i j

Cylinders for tail threading

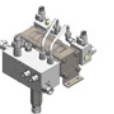

c e

Calender lubrication unit

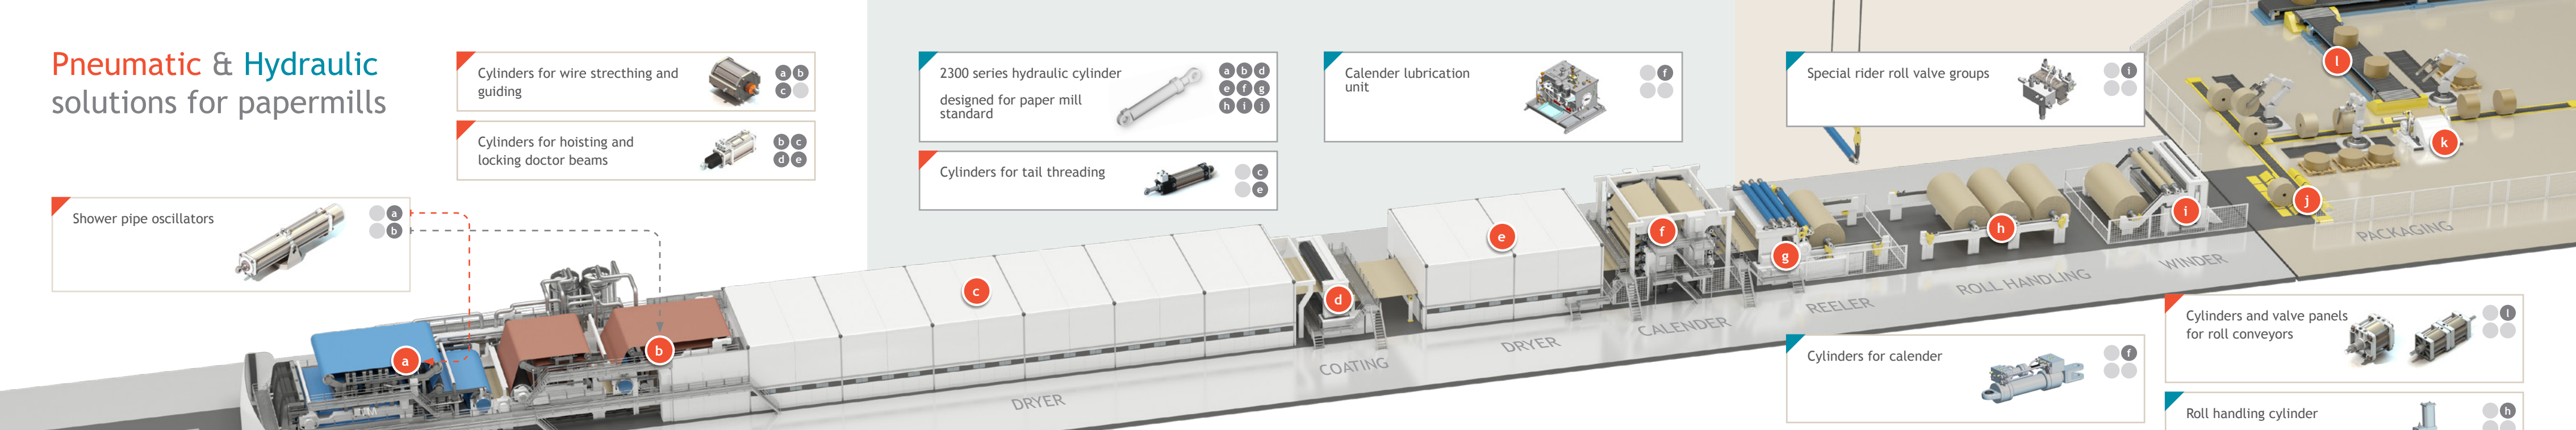

f

Special rider roll valve groups

i

Cylinders for calender

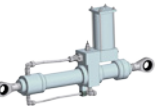

f

Cylinders and valve panels for roll conveyors

l

Roll handling cylinder
Roll stopper cylinder

h

Pneumatic components

- Locking cylinders for wire changes a b
- Shower pipe oscillators a b
- Suction roll shower pipe oscillators b
- Cylinders for wire stretching and guiding a b c
- Limit valves for wire guiding a b c
- Doctor blade oscillators b c d e
- Cylinders for hoisting and locking doctor beams b c d e
- Turnbuckles b c d e
- Oscillating unit for thermal camera d
- Pneumatic controls for doctor blade pressure d

- Cylinders for tail threading c e
- Guide rod cylinders for tail threading c e
- Steam box cylinders c e
- Cylinders for parent roll and reel spool storages g h
- Fast speed cylinders for web cutting g h
- Web slashers g h
- Slitter blade actuators i j
- Roller diaphragm cylinders for knife holders i j
- Cylinders for reelers i j
- Cylinders for wrapping machines k
- Cylinders and valve panels for sorting conveyors i j l

Hydraulic components

- Nip valve groups a
- Nip power unit a
- Hydraulic Jack Cylinder b
- Calender multinip relief cylinder f
- Calender multinip load cylinder f
- Calender valve group f
- Calender power unit f
- Calender lubrication unit f
- Cylinders for calender f
- Rotary joint cooling unit f
- Super calender valve panel f

- Pope valve groups and power unit g
- Winder valve groups i
- Special rider roll valve groups i
- Winder power unit i
- Tambour station valve groups h
- Roll handling cylinder h
- Roll stopper cylinder h
- 2300 series hydraulic cylinder, designed for paper mill standard a b d e f g h i j
- HCN-16 hydraulic cylinder j k l
